Alumni Association

The true supporters and key stakeholders in the college are its alumni. The RK Vigyan Mahavidyalaya alumni association was established in 2022-2023 with the goal of connecting our institute's former students. Communication options for alumni include WhatsApp groups, email addresses, and phone numbers. The alumni association serves as a link between students' college experiences and their professional careers.

Through one-on-one conversations, guest lectures, and other means, alumni have taught current students about industry expectations and how to meet them.

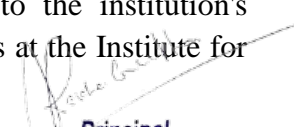

The Alumni Association initiated alumni relations. Alumni from the institute engage with current students to provide career advice and assistance with competitive exam preparation. The qualified alumni share their knowledge with students to help them prepare for competitive exams.

Training and Career Guidance: Alumni members actively participate in providing students with a variety of training and career development sessions. Alumni members assist students in preparing for interviews, which benefits them during their campus placement and, as a result, in these interactions.

Placement Assistance: Alumni members help set up various campus interviews and exchange information about open positions. This assistance resulted in an improvement in overall student placement at the institute.

Alumni support the institute's library by making book donations. In addition, alumni lead group discussions on a variety of social topics and educate Institute students on drug abuse, anti-bullying, and other social issues.

The alumni association helps and inspires their younger members by providing assistance, guidance, and collaboration. As a result, the alumni network contributes significantly to the institution's development. Alumni promote the development of human values, mentor students at the Institute for Higher Education, and assist the social health care system.
